

# THE FUTURE OF MEDICINE STARTS HERE, WITH YOU.

## DOCTOR OF OSTEOPATHIC MEDICINE (DO)

You want to improve health equity and access to care for your community as a physician-leader. Duquesne's Doctor of Osteopathic Medicine (DO) program focuses on a culture of wellness and preventative medicine for everyone.

### Built on Duquesne's 145-year legacy of serving others, here you will:

- Build medical skills to prevent, diagnose and treat a wide range of health conditions from **supportive faculty**, who will help you reach your bigger goal of becoming a physician.
- Be prepared with curriculum that integrates **scientific and clinical learning** and **diversity, equity and inclusion** to better serve diverse communities.
- Train in a **new campus building** and the latest in medical technologies, including a **simulation hospital** and **HoloAnatomy lab**.
- Develop osteopathic manipulative medicine (OMM) techniques with **hands-on learning opportunities**, starting in your first year.
- Learn patient-centered clinical skills at various **urban and rural clinical community partners** and gain a global perspective with international medical service trips and clinical rotations.
